- The itinerary is based on a **minimum of 10 persons**.

About the kindergarten and teaching program

The Teaching Program in Tigman Village offers a unique opportunity to make a difference in the lives of both elementary and kindergarten students. The program focuses on enhancing skills in English, Math, and Science for children aged 6–12, while also supporting early childhood education for kids aged 3–6.

Participants will design and lead interactive lessons, **share their culture through stories** and visuals, and **assist with classroom management** and hygiene routines. By working alongside local teachers, you'll create a positive learning environment while immersing yourself in the vibrant Filipino culture and contributing to the community's growth.

Your role is essential, and your mission includes the following:

- Teach English, Math, and Science in informal and interactive ways.
- Plan and deliver lessons aligned with the school curriculum.
- Organize and facilitate engaging learning activities such as songs, dances, and sports.
- Collaborate with local teachers to organize lessons and assessments.
- Actively engage in cultural exchanges by sharing personal experiences and learning about local customs.

About the construction and renovation program

The Construction and Renovation Program in Tigman Village, Aborlan, Palawan, offers a valuable opportunity to contribute to the development of this peaceful community. This program aims to **improve essential structures** such as schools, healthcare centers, homes, and community spaces, helping create safer, **more functional environments** for education, health, and social life.

Volunteers will assist in constructing and renovating key facilities, such as schools, community halls, and homes.

Tasks will include:

- Painting walls
- Repairing furniture
- Building communal spaces
- Digging, assembling, and arranging construction materials.
- Participants will also ensure the safe use of tools and seek guidance from local coordinators as needed.
